

**“While times may have changed,
quality is still quality.”**

*Ornel® - Providing the highest quality and efficiency
in axial flow pumping solutions since 1950*

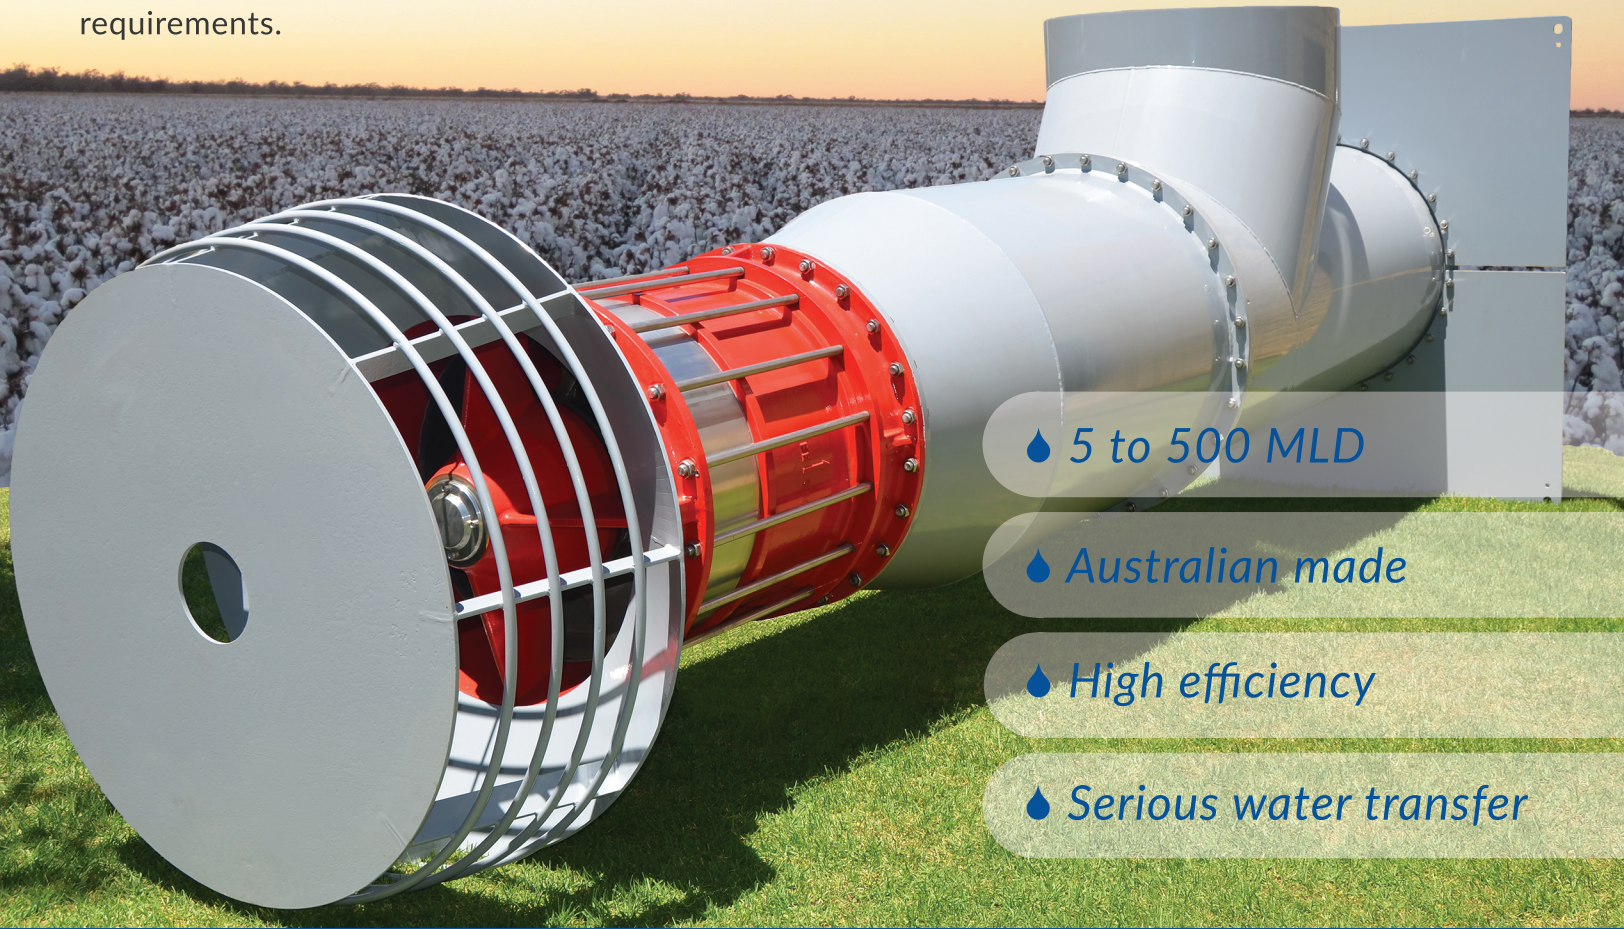

**Fluid
Engineering**
ADVANCED DESIGN - HIGH EFFICIENCY

Whatever your water transfer needs, with pumping capacities between five and five hundred megalitres per day, Fluid Engineering's range of Ornel® Floodlifter axial flow turbine pumps has you covered. Proudly Australian made, the Ornel® name is synonymous with quality and efficiency.

Fluid Engineering custom manufactures each Ornel® Floodlifter to suit specific application requirements.

As a distributor of Amarillo Gear Company right angle drives, Fluid Engineering can offer you a complete turnkey solution for your water transfer needs. Reinforcing the company's commitment to quality, Fluid Engineering offers servicing, spare parts and upgrades for all Ornel® pumps across the country.

Contact Fluid Engineering today and trust Ornel® pumps for serious water transfer.

💧 5 to 500 MLD
